

Product Information Sheet

Mobile Science Cart

Our IT-enabled science cart incorporates a series of digital presentation tools linked to an on-board computer. This computer can be loaded with a comprehensive series of science lessons that can be mapped to your curriculum. The cart can also be used to store trays of equipment for teacher demonstrations or student practical activities.

Using these resources, teachers are able to provide engaging science lessons in any suitable teaching space outside the traditional science lab. As it is fully mobile and has lockable storage, it can be stored safely at the end of the science lessons or moved to a secure area.

The cart is fully configurable and provides a cost-effective solution for teaching science without the need to provide a fully-equipped science lab.

The mobile cart comes equipped with the following resources as standard:

- 13 storage trays, secured in a lockable storage space
- Large, chemical-resistant work surface
- Science cart computer (wifi-enabled)
- Large flat-screen monitor
- Wireless keyboard/mouse
- Chemical sink and tap with integral water supply and waste with electronic alarms
- Optional integral propane gas supply and dual-outlet gas tap (gas bottle not supplied)
- Interface panel with USB socket, network socket, VGA output and mains electricity connection

Order Code: 550-01
