

Product Information Sheet

Function Generator

Selected to accompany the LJ Create range of electronics training systems, this unit is used for practical investigation of circuit theory, test and troubleshooting.

This function generator provides very high waveform quality. That means low sinewave distortion, low aberration triangle waves and fast-edged square waves with low overshoot.

Features:

- Sine, triangle and square wave outputs
- 0.2Hz to 3MHz frequency range
- 2mV to 20V pk-pk
- 50 Ω or 600 Ω source
- DC offset
- High waveform quality at all frequencies & levels
- Digital display of frequency and amplitude

Order Code: 300-15

P6402-D
