

Earth Science (STEM Learning)

LJCREATE™
Learning for life

Did you know that Jupiter is the largest planet in our solar system? It is over 120 times bigger than Earth.

If Jupiter was the size of a basketball, the Earth would be as small as a golf ball!

MERCURY
Mercury is the closest planet to the Sun

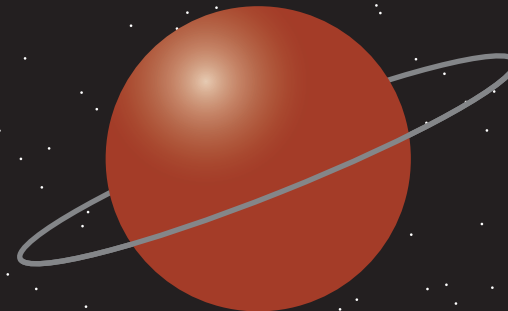

VENUS
Venus receives less light than Mercury

EARTH
Planet Earth receives just the right amount of light for humans to live and plants to grow

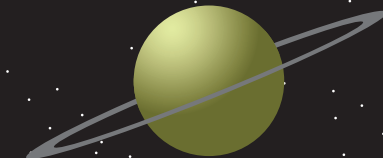

MARS
Mars is the fourth closest planet to the Sun

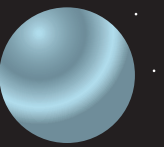

JUPITER
Jupiter is a gas giant

SATURN
Saturn receives less light from the Sun than Jupiter, this makes it a very cold planet

URANUS
Uranus is the seventh planet from the Sun.

NEPTUNE
Neptune receives very little light from the Sun
